# TiLearn

The new Religious School Model: 1 day onsite, one day at your computer!

Why TiLearn?

- Families looking for flexible options

- Have a permanent timetable clash with school/sports activity

- Can log on from any computer with internet access

- Students who prefer a more technology based form of learning will become more engaged

Why do kids like TiLearn?

- Encourages critical-thinking, creativity, and effective communication skills.

- Technology helps make Judaism accessible and relevant to student *and families*.

- Helps to inspire passionate, *personal responsibility* for learning.

- Provides access to learning anytime and anywhere for continuous learning.

How Does TiLearn Work?

TiLearn requires a two-day commitment:

- Sundays at your computer 9am-10:15am

- Wednesdays at TI 4:15pm-5:45pm

While technology is integral to **TiLearn**, fostering a *learning community* will be of paramount importance. The Wednesday program is instrumental to our School. We feel it gives the students the face-to-face interaction necessary to developing relationships and community.

TiLearn: benefits to this learning model

- Different approaches to learning: audio, visual, diagrams, photos, drawings etc
- Innovative platforms and software
- Students who prefer to work in quiet space without interruptions and distractions will benefit
- Students are able to respond after taking time to think about their response: they can say it aloud, type it and see it before pressing send, simply think it over without feeling pressured to be quick
